

Environmental Statement

As pioneers in sustainable fiber technology, Universal Fibers® remains steadfast in our promise to provide environmental stewardship that values resource conservation while supporting the wellbeing of our Associates and the communities in which we work and live.

Universal Fibers is constantly improving our Environmental Management System to ensure compliance with environmental regulations and other requirements. We have defined and measurable goals for waste reduction, water use and energy conservation. We remain steadfast in our promise to provide the global market with the most sustainable products and services in the fiber industry.
